

WhatsApp OTP Authentication - Cost Overview

MSG91 pricing for an India-first mobile application with international number support

Proposed Implementation

MSG91 WhatsApp OTP can be used for mobile-number authentication. Users enter their phone number, receive a one-time passcode through WhatsApp, and enter the code in the app to complete verification. The production WhatsApp Business setup, sender number, and billing should be owned by the client.

India WhatsApp OTP Pricing

Current listed India authentication-message rate: INR 0.115 per WhatsApp OTP message (excluding 18% GST).

WhatsApp OTPs	Base Cost	Approx. incl. 18% GST
100	INR 11.50	INR 13.57
1,000	INR 115	INR 135.70
10,000	INR 1,150	INR 1,357
100,000	INR 11,500	INR 13,570
1,000,000	INR 115,000	INR 135,700

Estimates assume one WhatsApp authentication message per OTP request. Actual billing can change if rates are updated or additional messages are sent.

International Number Support

The same authentication flow can accept international phone numbers in E.164 format. The WhatsApp authentication-message price varies according to the recipient's country.

Recipient Country	Example Authentication Rate
India	INR 0.115
Pakistan	INR 0.396
United States	INR 0.2491
UAE	INR 1.1509
United Kingdom	INR 1.6122
Germany	INR 4.0322

Other Cost Considerations

MSG91's dedicated OTP Widget is listed at INR 0/month. Depending on the exact MSG91 WhatsApp product/account configuration, other platform charges may apply. Taxes and future provider/Meta pricing changes are not included in the base rates above.

Account & Eligibility Requirement

WhatsApp authentication templates require an eligible WhatsApp Business setup. Before production launch, the client's Meta/WhatsApp Business account should be checked for authentication-template eligibility and required business verification.

Budgeting Recommendation

For an India-first application, the current INR 0.115 base rate makes WhatsApp OTP inexpensive at scale. For example, 10,000 Indian OTP messages would cost approximately INR 1,150 before GST. International users can use the same authentication flow, with message cost varying by destination country.
